## LAMEHUG: FIRST AI-POWERED MALWARE LINKED TO RUSSIA'S APT28

Pierluigi Paganini July 18, 2025

**LameHug malware uses AI to create data-theft commands on infected Windows systems. Ukraine links it to the Russia-nexus APT28 group.**

Ukrainian CERT-UA warns of a new malware strain dubbed LameHug that uses a large language model (LLM) to generate commands to be executed on compromised Windows systems.

# Microsoft Copilot's own default configuration exposed users to the first-ever "zero-click" AI attack, but there was no data breach

News

By [Kevin Okemwa](#) published June 13, 2025

Research firm uncovers the first zero-click attack on Microsoft 365 Copilot, but Microsoft has since patched the issue and states that bad actors did not access sensitive user data.

## Estudiante universitario de Mass. acusado de hackear masivamente a empresa de software escolar

Assumption University student Matthew D. Lane "stole private information about millions of children and teachers, imposed substantial financial costs on his victims, and instilled fear in parents that their kids' information had been leaked into the hands of criminals," U.S. Attorney for Massachusetts Leah Foley said
